

# Year 6 Newsletter

September 2024

First of all, welcome to Year Six. We have a lot of work ahead of us but I'm sure that with time and effort we will achieve our goals.

Throughout the year the children will be having spelling tests. The children should not only learn how to spell the words, but also how to use them so it will help them in their comprehension and with making their own writing more interesting.

In the next month, the children will be reading poetry and also performing poems, as well as attempting to write their own poems.

We will be revising grammar rules, conjunctions, and relative pronouns as well as learning how to check and improve our written work.

In Maths we will revise: place value, rounding whole numbers and decimals, multiplying and dividing by multiples of 10 and addition of whole numbers and decimals.

In Science we will be investigating micro-organisms. We will investigate the uses, good and bad, of viruses, bacteria and fungi. We will look into hygiene and food preservation.

In our Geography lessons we will be learning about rivers. We will learn the vocabulary of various parts of rivers and finding out about the major rivers of the world and the cities that have grown around them.

History will take us back to Ancient Greece. We will be learning about the people and the culture as well as the language. We will find out how their influence has an impact even today!

As always, if you have any questions or concerns, please feel free to contact Ms Omeash and make an appointment. I look forward to meeting you and getting to know your children.

Let's have a great year!
