

# Year 6 Newsletter

December 2024

There are only a few days left before we all go on holiday for a well-earned rest!

In these next few days the children will complete the plays they have been working on. We have started a new unit and will be revising the use of pronouns and apostrophes. We will rediscover synonyms, and learn about similes and idioms; many of them seem to make no sense!

In Maths we will complete the unit on how to find the perimeter and area of regular shapes. There will be a small test. We will then be revising division; long and short.

In Science we have learnt about 'Plant Life Cycles'. We have learnt the parts of flowers and their functions, as well as learning about pollination, fertilisation and the ideal conditions for germination. There will be a test before we leave.

There will also be a small unit test in Geography and then we will start looking at 'Water'. We will learn that not everyone has this precious commodity readily available. What do people do when water does not come through a tap?

We have learnt many things about the Ancient Greeks and their land. We have seen how their influence is still with us: in architecture, language, ideas, Maths, Science, government.

As always, if you have any questions or concerns, please feel free to contact Ms Omeash and make an appointment.

I wish you and your family a peaceful holiday. We will meet again in the new year! Remember the first day back at school is Monday, 6<sup>th</sup> January.

Happy  
Holidays
